

Scalar Double Chain + N+/-1 Full Sequences

Puzzle 135 & Puzzle 130 - Complete Session Archive

Generated: 2026-06-11

This document contains the full 127-double chains and complete 256-step N+1 and N-1 double-and-add sequences for both puzzle bands. Each sequence file includes Phase 1 (doubles) and Phase 2 (every bit step).

Executive Summary

Scalar double chains + full N+1 / N-1 double-and-add walks for puzzles 135 and 130.

- Phase 1: 127 scalar doubles from base = LO + LO/2 ($k < 2k \bmod N$).
- Phase 2: 256-bit MSB-first DA - acc=0; each step $\text{acc} < 2 * \text{acc}$; on bit 1 add SEED.
- N+1 closure: final acc = SEED (since $k * (N+1) \bmod N = k$).
- N-1 closure: final acc = N - SEED (since $k * (N-1) \bmod N = -k \bmod N$).
- Puzzle 135 seed (step127): 41512357110303327057832403173916941977504
- Puzzle 130 step127 seed: 1297261159696978970557262599184904436797
- Puzzle 130 known d: 1103873984953507439627945351144005829577

Puzzle 135 private key NOT recovered. Known d130 not on generic step127 chain.

N+1 / N-1 bit structure (256 bits each)

N+1: ones=192 zeros=64

[illegible]

N-1: ones=191 zeros=65

```

000
```

Correct rules (do not confuse)

```
Scalar double:      k' = 2*k mod N
Scalar square:      k' = k^2 mod N      (WRONG pipeline)
DA on bit 1:       acc = 2*acc + SEED mod N  (NOT acc*3)
DA on bit 0:       acc = 2*acc mod N
```

Key puzzle 135 values

```
